ALX Uranium Corp. Announces Commencement of Drilling Program at the Hook-Carter Uranium Project, Athabasca Basin, Saskatchewan

Vancouver, BC, Canada, February 13, 2018 – ALX Uranium Corp. (“ALX” or the “Company”) (TSXV: AL; FSE: 6LLN; OTC: ALXEF) is pleased to announce that a \$2.2 million diamond drilling program has commenced at the Hook-Carter Uranium Project (“Hook-Carter”, or the “Project”) located in the southwestern Athabasca Basin of Saskatchewan, Canada. Approximately 10,000 metres of drilling is planned in up to 17 holes to test compelling targets generated from geophysical surveys completed in 2017.

Exploration at Hook-Carter is operated by Denison Mines Corp. (“Denison”) (TSX: DML, NYSE MKT: DNN). The Project is owned 80% by Denison and 20% by ALX, and is located along the prolific Patterson Lake Corridor – host to the Triple R uranium deposit (Fission Uranium Corp.), the Arrow uranium deposit, Harpoon, Bow and South Arrow uranium discoveries (NexGen Energy Ltd.), and the Spitfire, Hornet and Dragon uranium discoveries (a joint venture of Purepoint Uranium Group Inc., Cameco Corp., and AREVA Resources Canada Inc.). Denison has agreed to fund the first \$12.0 million of expenditures at Hook-Carter (see ALX news releases dated October 13, 2016 and November 7, 2016).

ALX believes Hook-Carter is significantly underexplored, with only five historical drill holes located along the 15 kilometres of interpreted strike length of the Patterson Lake Corridor that lies within the Project.

“Since 2012, over 300,000 metres of drilling has been carried out on the known uranium deposits and occurrences found along the Patterson Lake Corridor,” said Sierd Eriks, President and Chief Geologist of ALX. “In contrast, Hook-Carter has only been tested by about 4,000 metres of drilling in a handful of holes more than ten years ago, which makes this drilling program long overdue.”

FORWARD LOOKING STATEMENTS

Statements in this document which are not purely historical are forward-looking statements, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Forward looking statements in this news release for example include and are not limited to the 2018 drilling program by Denison at Hook-Carter, and the anticipated benefits of the planned program. It is important to note that actual outcomes and the Company's actual results could differ materially from those in such forward-looking statements. Risks and uncertainties include economic, competitive, governmental, environmental and technological factors that may affect the Company's operations, markets, products and prices. Factors that could cause actual results to differ materially may include misinterpretation of data; that we may not be able to get equipment or labour as we need it; that we may not be able to raise sufficient funds to complete our intended acquisitions, exploration or development; that our applications to drill may be denied; that weather, logistical problems or hazards may prevent us from exploration; that equipment may not work as well as expected; that analysis of data may not be possible accurately and at depth; that results which we or others have found in any particular location are not necessarily indicative of larger areas of our properties; that we may not complete environmental programs in a timely manner or at all; that market prices may not justify commercial production costs; and that despite encouraging data there may be no commercially exploitable mineralization on our properties.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
