EMERALD BAY UPDATES KUHN 3 OPERATIONS

Calgary, Alberta, March 7, 2018

Emerald Bay Energy Inc. (TSX Venture: EBY) (the “Company” or “Emerald Bay”) is pleased to provide the following update on operations to tie in the Kuhn 3 well at the Company’s Wooden Horse play in Southwest Texas. After experiencing several days of limited access to the lease due to weather, crews have been on location for the past week and have been able to trench flow lines, set the pump jack in place, and install the necessary electrical equipment in preparation for running the rods and pump in the well later this week. The well is now tied into production facilities. With a bottom hole shut in pressure of 724 psi and 120 psi at the wellhead, the well is currently free-flowing oil up the flow line to the tank battery. With the current flow rates and pressure it may be difficult to run the pump in the well at this time, however the Company has arranged to have a rig on location Saturday to attempt to swab the well down sufficiently in order to run the pumping equipment in. The Company will provide further updates as they become available.

Forward-Looking Statements

This press release includes statements that may constitute "forward-looking" statements, usually containing the words "believe," "estimate," "project," "expect," "plan," "intend," "anticipates," "projects," "potential" or similar expressions.. Forward-looking statements inherently involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. Forward-looking statements are statements that are not historical facts.

Information inferred from the interpretation of drilling results may also be deemed to be forward looking statements, as it constitutes a prediction of what might be found to be present when and if a well is actually developed. BOE's may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 Mcf: 1 Bbl is based on energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. The reader is cautioned that assumptions used in the preparation of such information, which are considered reasonable by Emerald Bay at the time of preparation, may prove to be incorrect. Actual results achieved will vary from the information provided and the variations may be material. There is no representation by Emerald Bay that actual results achieved will be the same in whole or part as those indicated in the forward-looking statements. Forward-looking statements in this document include statements regarding the Company's exploration, drilling and development plans, the Company's expectations regarding the timing and success of such programs. In particular, forward-looking information in this news release includes, but is not limited to, statements with respect to: pipeline acquisitions and leasing; pipeline permits, pipeline construction, production estimates, drilling operations, completion operations, funding and development goals. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, level of activity, performance or achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information. Factors that could cause or contribute to such differences include, but are not limited to, fluctuations in the prices of oil and gas, uncertainties inherent in estimating quantities of oil and gas reserves and projecting future rates of production and timing of development activities, competition, operating risks, acquisition risks, liquidity and capital requirements, the effects of governmental regulation, adverse changes in the market for the Company's oil and gas production, dependence upon third-party vendors, and other risks detailed in the Company's periodic report filings with the applicable securities regulators.
